```
src > theme > variables.scss > :root
1 // Ionic Variables and Theming. For more info, please see:
2 // http://ionicframework.com/docs/theming/
3
4 /** Ionic CSS Variables **/
5 :root {
6   /** primary **/
7   --ion-color-primary: #eb445a;
8   --ion-color-primary-rgb: 235, 68, 90;
9   --ion-color-primary-contrast: #ffffff;
10  --ion-color-primary-contrast-rgb: 255, 255, 255;
11  --ion-color-primary-shade: #cf3c4f;
12  --ion-color-primary-tint: #ed576b;
13
14  /** secondary **/
15  --ion-color-secondary: #3dc2ff;
16  --ion-color-secondary-rgb: 61, 194, 255;
17  --ion-color-secondary-contrast: #ffffff;
18  --ion-color-secondary-contrast-rgb: 255, 255, 255;
19  --ion-color-secondary-shade: #36abe0;
20  --ion-color-secondary-tint: #50c8ff;
21
22  /** tertiary **/
23  --ion-color-tertiary: #5260ff;
24  --ion-color-tertiary-rgb: 82, 96, 255;
25  --ion-color-tertiary-contrast: #ffffff;
26  --ion-color-tertiary-contrast-rgb: 255, 255, 255;
27  --ion-color-tertiary-shade: #4854e0;
28  --ion-color-tertiary-tint: #6370ff;
29
```

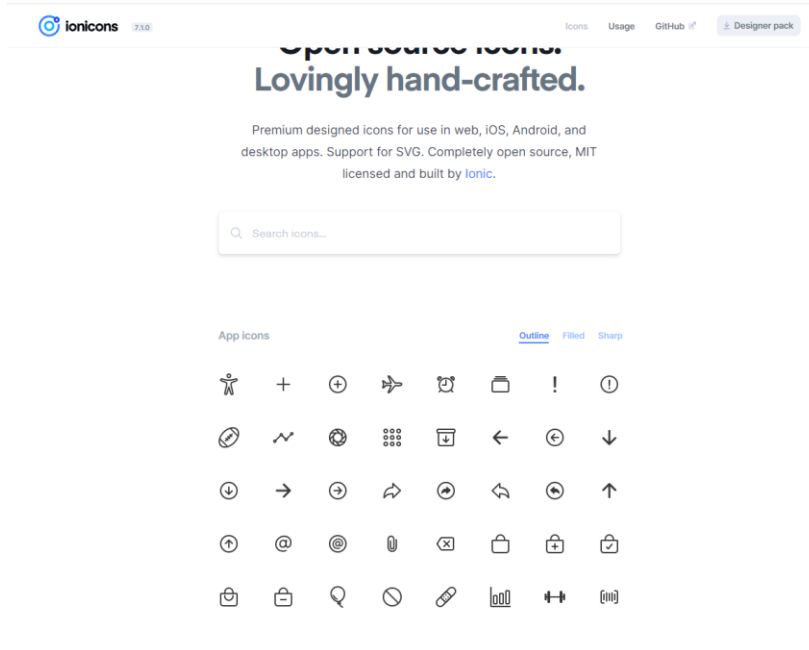

2.3 **Typography & Font Family** – user can easily change the ionic elements colors through Global.scss file.

```
11
12 /* Core CSS required for Ionic components to work properly */
13 @import "@ionic/angular/css/core.css";
14
15 /* Basic CSS for apps built with Ionic */
16 @import "@ionic/angular/css/normalize.css";
17 @import "@ionic/angular/css/structure.css";
18 @import "@ionic/angular/css/typography.css";
19 @import "@ionic/angular/css/display.css";
20
21 /* Optional CSS utils that can be commented out */
22 @import "@ionic/angular/css/padding.css";
23 @import "@ionic/angular/css/float-elements.css";
24 @import "@ionic/angular/css/text-alignment.css";
25 @import "@ionic/angular/css/text-transformation.css";
26 @import "@ionic/angular/css/flex-utils.css";
27
28
29 @font-face {
30   font-family: 'Exo';
31   src: url('./assets/fonts/exo.woff2');
32   font-weight: 400;
33   font-style: normal;
34 }
35
36 @font-face {
37   font-family: 'Satisfy';
38   src: url('./assets/fonts/satisfy.woff2');
39   font-weight: 400;
40   font-style: normal;
41 }
```

Shagun – Dating and Match Making Application

2.4 Iconography – user can easily change the ionic icons through **ionic.io**

5. Ionic Documentations

5.1 Ui Components

Ionic apps are made of high-level building blocks called Components, which allow you to quickly construct the UI for your app. Ionic comes stock with a number of components, including cards, lists, and tabs. Once you're familiar with the basics, refer to the API Index for a complete list of each component and sub-component.

Link - <https://ionicframework.com/docs/components>

The screenshot shows the Ionic v7.0.0 documentation page for UI Components. The page has a navigation sidebar on the left with a tree view containing categories like 'Getting Started', 'Action Sheet', 'Accordion', 'Alert', 'Badge', 'Breadcrumb', 'Button', and 'Card'. The main content area is titled 'UI Components' and includes an introductory paragraph: 'Ionic apps are made of high-level building blocks called Components, which allow you to quickly construct the UI for your app. Ionic comes stock with a number of components, including cards, lists, and tabs. Once you're familiar with the basics, refer to the API Index for a complete list of each component and sub-component.' Below the text are four component cards: 'Action Sheet' (with a mobile app mockup), 'Alert' (with a list icon), 'Badge' (with a red circle icon), 'Button' (with a blue button icon), and 'Card' (with a document icon). Each card contains a brief description of the component's purpose.

5.2 Documentations

Ionic is an open source UI toolkit for building performant, high-quality mobile apps using web technologies — HTML, CSS, and JavaScript — with integrations for popular frameworks like Angular, React, and Vue.

Get started building by installing Ionic or following our First App Tutorial to learn the main concepts.
